Bulk SMS for Organizations, Companies, Political Campaigns and Charities

SMS (Short Message Service aka Text Messaging) is the best way to contact your constituents, customers, members, congregation or any other group with whom you wish to maintain regular contact. Text messages to cell phones are the most-read media in the history of print media. About 96% of all text messages are read within 6 minutes of receipt. If you're not using this form of communication to stay in contact with those who matter most, YOU SHOULD BE!

How Voifone™ Bulk SMS Works

For non-USA-based text messaging (SMS) you simply upload your list of phone numbers to our platform, create your message and with a single click send your message to the entire list. We have 2 different Bulk SMS platforms. Both are web-based and accessed through your computer's browser online. One is the Wholesale platform. It's a simple but elegant interface that allows you to upload your phone lists, create messages, and with a single click, instantly deliver all messages. You can even include a short URL for your recipients who use smart phones & tablets for their text messaging (provided you have a mobile-friendly website or web page for mobile devices). The International Bulk SMS platform has more features and better analytics and does basically the same thing, but at a higher price for the additional features.
